From field to table...

NAT-UR
Plastic Made from Plants

The Earth-Friendly Alternative

It's time for a fresh look at table service ware

Imagine products that are environmentally neutral and return to nature without a trace, using renewable food crops and replacing petroleum-based plastics. NAT-UR has created an economically competitive product line that isn't affected by the climbing price of oil.

NAT-UR
Plastic Made from Plants

Nat-UR... the right choice of the right time

The NAT-UR products were designed to meet a growing demand for eco-friendly alternatives. They are:

- Environmentally friendly - Products are produced from fast-growing plants in the USA.
- Economically viable - They are priced to compete with traditional plastic products.
- Biodegradable - Consumers are searching for eco-friendly alternatives.

Environmental & Financial

- Since NAT-UR products are biodegradable, they are ideal for restaurants and food service.
- Since NAT-UR products are made from renewable resources, they are a more sustainable choice.
- Since NAT-UR products are made from renewable resources, they are a more sustainable choice.

Corporate Environmental Report
